

# Plugin Management

Plugins extend and expand the functionality of WordPress. Once a plugin is installed, you may activate it or deactivate it here.

Deactivate All Plugins

| Plugin  | Version | Description  | Status   | Action  |
|---|---------|--|----------|---|
| Akismet   | 2.1.4   | Akismet checks your comments against the Akismet web service to see if they look like spam or not. You need a <a href="#">WordPress.com API key</a> to use it. You can review the spam it catches under "Comments." To show off your Akismet stats just put <code>&lt;?php akismet_counter(); ?&gt;</code> in your template. See also: <a href="#">WP Stats plugin</a> . <i>By Matt Mullenweg.</i> | Inactive | <a href="#">Activate</a>   <a href="#">Edit</a>   |
| There is a new version of Akismet available. <a href="#">Download version 2.1.6 here</a> or <a href="#">upgrade automatically</a> . |         |  |          |   |
| Dagon Design Form Mailer  | 5.4     | The WordPress plugin version of my secure php form mailer script <i>By Dagon Design.</i>   | Active   | <a href="#">Deactivate</a>   <a href="#">Edit</a> |
| Hello Dolly   | 1.5     | This is not just a plugin, it symbolizes the hope and enthusiasm of an entire generation summed up in two words sung most famously by Louis Armstrong: Hello, Dolly. When activated you will randomly see a lyric from Hello, Dolly in the upper right of your admin screen on every page. <i>By Matt Mullenweg.</i>   | Inactive | <a href="#">Activate</a>   <a href="#">Edit</a>   |
| Post Count  | 1.1     | Outputs the total number of posts. <i>By Nick Momrik.</i>  | Active   | <a href="#">Deactivate</a>   <a href="#">Edit</a> |
| Simple Recent Comments  | 0.1.2   | Shows a list of recent comments. <i>By GNot.</i>   | Active   | <a href="#">Deactivate</a>   <a href="#">Edit</a> |
| WP-PageNavi   | 2.30    | Adds a more advanced paging navigation to your WordPress blog. <i>By Lester 'GaMerZ' Chan.</i>   | Active   | <a href="#">Deactivate</a>   <a href="#">Edit</a> |
| WP-PostRatings  | 1.30    | Adds an AJAX rating system for your WordPress blog's post/page. <i>By Lester 'GaMerZ' Chan.</i>  | Active   | <a href="#">Deactivate</a>   <a href="#">Edit</a> |
| WP-PostRatings Widget   | 1.30    | Adds a PostRatings Widget to display most rated and/or highest rated posts and/or pages on your sidebar. You will need to activate WP-PostRatings first. <i>By Lester 'GaMerZ' Chan.</i>   | Inactive | <a href="#">Activate</a>   <a href="#">Edit</a>   |

If something goes wrong with a plugin and you can't use WordPress, delete or rename that file in the `wp-content/plugins` directory and it will be automatically deactivated.

Form Structure

Fields are separated with a newline – See documentation for usage instructions

type=text|class=fmtext|label=Site Name|fieldname=fm\_sitename|max=100|req=true

type=text|class=fmtext|label=URL Site|fieldname=fm\_url|max=100|req=true|ver=url

type=text|class=fmtext|label=Tags|fieldname=fm\_tags|max=100

type=text|class=fmtext|label=Your Email|fieldname=fm\_email|max=100|req=true|ver=email

type=text|class=fmtext|label=Your Name|fieldname=fm\_yourname|max=100|req=true

type=textarea|class=fmtextarea|label=Message|fieldname=fm\_message|max=1000|rows=6|

type=verify|class=fmverify|label=Are you human?

Manual Form Code

## Email Generation

The options below help generate the email headers. If you enter a field name, it will be replaced by the user input from that field.

For example, if you have a form field called **fm\_name** and you use that as the **Sender name** option, the visitor's name will be used as the **From** field in the email. You can also combine them. If you have a field called **fm\_firstname** and **fm\_lastname** you could enter '**fm\_lastname, fm\_firstname**' – For the **Sender email** option, just use your email field.

The **Email subject** option works the same way. For example, you could enter '**Contact: fm\_subject**' and it will use the subject that the visitor entered, with the '**Contact:**' prefix.

**Sender name:**

*If blank, email will show to come from 'Anonymous'*

**Sender email:**

*If blank, email will show to come from 'user@domain.com'*

**Email subject:**

*If blank, the subject line will be 'Contact Form'*

## Message Structure

**Note:** This field is optional – If left blank, the plugin will generate the message itself.
